

Albert Einstein: Father Of The Modern Scientific Age

Albert Einstein is universally regarded as the most brilliant scientist of the 20th century. In 1905, during his Miracle Year as a clerk in the Swiss patent office, he wrote four papers that revolutionized the field of theoretical physics. Over the course of his career, Einstein introduced modern science to the concept of space-time, inadvertently launched America on the path towards developing the atomic bomb, and was offered the presidency of Israel. He was the first scientific superstar, a world-wide celebrity whose popularity was matched only by his astounding feats of imagination. In his later years Albert Einstein was known as a gentle and lovable man who forgot his socks and rarely combed his hair. But he was much more than an absent-minded genius. He was a fierce individualist, who, as a teenager, renounced his German citizenship rather than serve in the army. As a rebel against every form of authority, an outspoken enemy of anti-Semitism and fascism, and a socialist with an enduring commitment to social justice, you will learn in this book that even as Einstein was setting Newtonian physics on its ear, he considered his most important work to be about something very different: the bettering of humanity.

Agradable ruta realizada junto al Bilbao Alpino que parte desde la localidad alavesa de Guinea, en la vertiente Sur de la sierra de Arkamo y que discurre por las cimas de Olvedo, Pelistornes y Cantoblanco.

Desde Guinea el camino es muy evidente, ya que las dos primeras cimas están muy cerca y separadas por un pequeño collado. Su subida es corta y casi directa y está señalizada justo a la salida del pueblo.

Al Olvedo se llega relativamente rápido. A pesar de que las nubes a veces nos impiden apreciar las vistas, el paisaje se intuye precioso.

2017-01-22_10-36-17

Para pasar del Olvedo al Pelistornes tan sólo tenemos que cruzar el collado y llegaremos en apenas 10 minutos a nuestra segunda cima del día.

2017-01-22_10-53-02

Una vez coronadas las cimas anteriores hay que continuar la travesía en dirección a la al Cantoblanco, que se asciende tras un durillo cortafuegos.

20170122_123405

Desde la cima tenemos justo en frente el Montemayor, máxima altura de la vecina sierra de Arkamo.2017-01-22_13-00-09

Finalmente, iniciamos el descenso hacia la curiosa localidad de Salinas de Añana...

20170122_142807

...donde podremos completar la ruta con una visita a las propias Salinas.

20170122_142812

Una ruta de unos 15 kilómetros sin dificultades reseñables. Únicamente se hace necesaria logística de vehículos. De no tener esta facilidad entonces es mejor realizar únicamente la subida al Olvedo y Pelistornes.

Los Retos de 2017

Publicado el 01/24/2017 por 12meses12montes

Bueno, un nuevo año que ha pasado y uno nuevo que acaba de comenzar. 2016 fue un año muy intenso, si bien los retos que nos marcamos en un principio sólo se vieron cumplidos en una tercera parte. No fue un buen año para ellos, ésta vez la alineación de planetas se generó en pocas ocasiones.

Sin embargo, no decaemos. Cogemos el testigo y no vamos a desistir en su intento, por lo que los retos que no conseguimos cumplir en 2016 serán los que tratemos de realizar en 2017, más algunos otros, a ver qué os parecen. Seguir leyendo
