

Characterization of Materials, 2 Volume Set

Characterization of Materials (formerly Methods in Materials Research) provides comprehensive up-to-date coverage of materials characterization techniques including computational and theoretical methods as well as crystallography, mechanical testing, thermal analysis, optical imaging and spectroscopy, and more. Editor-in-Chief, Elton Kaufmann, Ph.D. is Associate Director of the Strategic Planning Group at the Argonne National Laboratory and has published approximately 100 technical papers in refereed journals and books. Dr. Kaufmann has assembled leading experts from academia, government, and industry to provide:

- * A comprehensive up-to-date collection of methods used in the characterization of materials
- * Articles on various methods from standard to cutting edge
- * Periodic online updates to keep pace with latest developments
- * A user-friendly format that is easy and simple to search and navigate

Characterization of Materials is a collection of characterization methods that is widely applicable in the wide and diverse field of materials research irrespective of discipline or ultimate application and with which researchers, engineers, and educators must have familiarity. Methods covered include:

- * General Vacuum Techniques
- * X-Ray Powder Diffraction
- * High Strain Rate Testing
- * Deep Level Transient Spectroscopy
- * Cyclic Voltammetry
- * Extended X-Ray Absorption Fine Structure
- * Low Energy Electron Diffraction
- * Thermogravimetric Analysis
- * Magnetometry
- * Transmission Electron Microscopy
- * Ultraviolet Photoelectron Spectroscopy

This reference work is also available as a convenient online edition. For information regarding the online edition, please visit: www.mrw.interscience.wiley.com/com

Agradable ruta realizada junto al Bilbao Alpino que parte desde la localidad alavesa de Guinea, en la vertiente Sur de la

sierra de Arkamo y que discurre por las cimas de Olvedo, Pelistornes y Cantoblanco.

Desde Guinea el camino es muy evidente, ya que las dos primeras cimas están muy cerca y separadas por un pequeño collado. Su subida es corta y casi directa y está señalizada justo a la salida del pueblo.

Al Olvedo se llega relativamente rápido. A pesar de que las nubes a veces nos impiden apreciar las vistas, el paisaje se intuye precioso.

2017-01-22_10-36-17

Para pasar del Olvedo al Pelistornes tan sólo tenemos que cruzar el collado y llegaremos en apenas 10 minutos a nuestra segunda cima del día.

2017-01-22_10-53-02

Una vez coronadas las cimas anteriores hay que continuar la travesía en dirección a la al Cantoblanco, que se asciende tras un durillo cortafuegos.

20170122_123405

Desde la cima tenemos justo en frente el Montemayor, máxima altura de la vecina sierra de Arkamo.2017-01-22_13-00-09

Finalmente, iniciamos el descenso hacia la curiosa localidad de Salinas de Añana...

20170122_142807

...donde podremos completar la ruta con una visita a las propias Salinas.

20170122_142812

Una ruta de unos 15 kilómetros sin dificultades reseñables. Únicamente se hace necesaria logística de vehículos. De no tener esta facilidad entonces es mejor realizar únicamente la subida al Olvedo y Pelistornes.

Los Retos de 2017

Publicado el 01/24/2017 por 12meses12montes

Bueno, un nuevo año que ha pasado y uno nuevo que acaba de comenzar. 2016 fue un año muy intenso, si bien los retos que nos marcamos en un principio sólo se vieron cumplidos en una tercera parte. No fue un buen año para ellos, ésta vez la alineación de planetas se generó en pocas ocasiones.

Sin embargo, no decaemos. Cogemos el testigo y no vamos a desistir en su intento, por lo que los retos que no conseguimos cumplir en 2016 serán los que tratemos de realizar en 2017, más algunos otros, a ver qué os parecen.
