

Prespacetime Journal Volume 7 Issue 3: Petrov Classification, Cosmological Models & Alternative Gravitation

Prespacetime Journal (PSTJ, <http://www.prespacetime.com>) is a publication in which physicists, mathematicians and other learned scholars publish their research results and express their views on the origin, nature and mechanism of spacetime and its possible connection to a prespacetime. It is also a journal where all learned scholars can present their models and experimental results on elemental particles, fundamental forces including gravity and related topics. This is PSTJ Volume 7 Issue 3 first published in March 2016. It is entitled Petrov Classification, Cosmological Models & Alternative Gravitation and contains following articles: (1) Algebraic Classification of the Weyl Tensor; (2) Physical Aspects of Bianchi Type-I Space-time with Quadratic Equation of State in $f(R)$ Gravity; (3) Magnetized Anisotropic Dark Energy with Specific Expansion; (4) Bulk Viscous String Cosmology with Hybrid Law Expansion in Modified Theory of Gravity; (5) Higher Dimensional Cosmological Model Universe with Quadratic Equation of State in Lyra Geometry; (6) On the Horndeski's Formula for the Lanczos Invariant; (7) Matter Inheritance Symmetries of Einstein-Rosen Space-time in General Theory of Relativity; (8) Five-dimensional FRW String Cosmological Models with Bulk Viscosity in Brans-Dicke Theory of Gravitation; (9) Spherically Symmetric Universe with Holographic Dark Energy & Generalized Chaplygin Gas; (10) Interacting LRS Bianchi Type-I Cosmological Model in $f(R, T)$ Gravity with Modified Chaplygin Gas; (11) Higher Dimensional FRW Perfect Fluid Cosmological Models in $f(R, T)$ Gravity; (12) On the Possible Role of Continuous Light Speed Expansion in Black Hole & Gravastar Cosmology; (13) Dark Energy Cosmological Model with Linear Equation of State in $f(T)$ Gravity; (14)

Inhomogeneous Bianchi type-VI₀ String Cosmological Model for Stiff Perfect Fluid Distribution in General Relativity; (15) The Mixmaster Universe with Variable Deceleration Parameter; (16) Heisenberg Group & Mannheim Curves; (17) On the Characterizations between Curvature Strip Curves & Ruled Surfaces in the Lorentz Space; (18) On Sinusoidal Time Variation of the Newtonian Gravitational Constant; and (19) On the Fate of Alternative Gravitation & Extra-Dimensional Theories.

Agradable ruta realizada junto al Bilbao Alpino que parte desde la localidad alavesa de Guinea, en la vertiente Sur de la sierra de Arkamo y que discurre por las cimas de Olvedo, Pelistornes y Cantoblanco.

Desde Guinea el camino es muy evidente, ya que las dos primeras cimas están muy cerca y separadas por un pequeño collado. Su subida es corta y casi directa y está señalizada justo a la salida del pueblo.

Al Olvedo se llega relativamente rápido. A pesar de que las nubes a veces nos impiden apreciar las vistas, el paisaje se intuye precioso.

2017-01-22_10-36-17

Para pasar del Olvedo al Pelistornes tan sólo tenemos que cruzar el collado y llegaremos en apenas 10 minutos a nuestra segunda cima del día.

2017-01-22_10-53-02

Una vez coronadas las cimas anteriores hay que continuar la travesía en dirección a la al Cantoblanco, que se asciende tras un durillo cortafuegos.

20170122_123405

Desde la cima tenemos justo en frente el Montemayor, máxima altura de la vecina sierra de Arkamo.2017-01-22_13-00-09

Finalmente, iniciamos el descenso hacia la curiosa localidad de Salinas de Añana...

20170122_142807

...donde podremos completar la ruta con una visita a las propias Salinas.

20170122_142812

Una ruta de unos 15 kilómetros sin dificultades reseñables. Únicamente se hace necesaria logística de vehículos. De no tener esta facilidad entonces es mejor realizar únicamente la subida al Olvedo y Pelistornes.

Los Retos de 2017

Publicado el 01/24/2017 por 12meses12montes

Bueno, un nuevo año que ha pasado y uno nuevo que acaba de comenzar. 2016 fue un año muy intenso, si bien los retos que nos marcamos en un principio sólo se vieron cumplidos en una tercera parte. No fue un buen año para ellos, ésta vez la alineación de planetas se generó en pocas ocasiones.

Sin embargo, no decaemos. Cogemos el testigo y no vamos a desistir en su intento, por lo que los retos que no

conseguimos cumplir en 2016 serán los que tratemos de realizar en 2017, más algunos otros, a ver qué os parecen. Seguir leyendo
