

Turn-On/Off Noises Explained

We have always enjoyed testing amplifiers. There are so many different designs and types. Yet even though they vary so much in design philosophy, very seldom does the creative effort of even the best designers ever result in an audible improvement over ordinary designs. Testing of hundreds of amplifiers over the years (and as many listeners) has convinced me that we are long past the threshold where there is much to gain in the area of audible performance. This certainly doesn't mean that we believe we can't improve amplifiers. Certain areas, i.e. signal modulated power supplies, transducer servo feedback, and innovative control and monitoring systems, leave quite a bit of room for development. I, Richard Clark, believe that the areas everyone seems to be fascinated with, such as distortion, noise, cross-talk, phase response etc. are past the point of audible improvement. When questioned about this recently by Bill Burton, the technical editor of CA&E, I told him that I was so convinced of this that I would pay \$10,000 to the first person who could show me that they can really hear the difference between two amplifiers provided those amplifiers were compared under identical conditions.

Agradable ruta realizada junto al Bilbao Alpino que parte desde la localidad alavesa de Guinea, en la vertiente Sur de la sierra de Arkamo y que discurre por las cimas de Olvedo, Pelistornes y Cantoblanco.

Desde Guinea el camino es muy evidente, ya que las dos primeras cimas están muy cerca y separadas por un pequeño collado. Su subida es corta y casi directa y está señalizada justo a la salida del pueblo.

Al Olvedo se llega relativamente rápido. A pesar de que las nubes a veces nos impiden apreciar las vistas, el paisaje se intuye precioso.

2017-01-22_10-36-17

Para pasar del Olvedo al Pelistornes tan sólo tenemos que cruzar el collado y llegaremos en apenas 10 minutos a nuestra segunda cima del día.

2017-01-22_10-53-02

Una vez coronadas las cimas anteriores hay que continuar la travesía en dirección a la al Cantoblanco, que se asciende tras un durillo cortafuegos.

20170122_123405

Desde la cima tenemos justo en frente el Montemayor, máxima altura de la vecina sierra de Arkamo. 2017-01-22_13-00-09

Finalmente, iniciamos el descenso hacia la curiosa localidad de Salinas de Añana...

20170122_142807

...donde podremos completar la ruta con una visita a las propias Salinas.

20170122_142812

Una ruta de unos 15 kilómetros sin dificultades reseñables. Únicamente se hace necesaria logística de vehículos. De no tener esta facilidad entonces es mejor realizar únicamente la subida al Olvedo y Pelistornes.

Los Retos de 2017

Publicado el 01/24/2017 por 12meses12montes

Bueno, un nuevo año que ha pasado y uno nuevo que acaba de comenzar. 2016 fue un año muy intenso, si bien los retos que nos marcamos en un principio sólo se vieron cumplidos en una tercera parte. No fue un buen año para ellos, ésta vez la alineación de planetas se generó en pocas ocasiones.

Sin embargo, no decaemos. Cogemos el testigo y no vamos a desistir en su intento, por lo que los retos que no conseguimos cumplir en 2016 serán los que tratemos de realizar en 2017, más algunos otros, a ver qué os parecen. Seguir leyendo
