

Deadball Stars of the National League: The Society for American Baseball Research (Photographic Histories)

This new volume is the first book establishing a relationship between Brasseys, Inc. and the premier research organization in all of sports, the Society for American Baseball Research. This initial release allows you to return to one of the most colorful, popular, important, and distinct periods of baseball history. With the Society for American Baseball Research to guide you, you'll learn about the stars, the regulars, and the people behind the scenes who were all the leading lights of the senior circuit. Through them, follow the great games opening decades as the original eight National League franchises combated the American League, only to strike up a partnership with it and start the World Series in 1903, launching the major leagues as we know them today. Lavishly illustrated, featuring photographs and autographs of every player or person profiled, Deadball Stars of the National League gives fans a unique window into the game of inside baseball, a time when the stolen base and the sacrifice were a manager's key weapons, when pitchers finished what they started, and when the baseball itself was a sodden, misshapen, tobacco-stained menace. Edited by Tom Simon and written and assembled by his fellow members of SABR's Deadball Era Committee, the unique resource Deadball Stars of the National League reflects a defining era of baseball history.

Agradable ruta realizada junto al Bilbao Alpino que parte desde la localidad alavesa de Guinea, en la vertiente Sur de la sierra de Arkamo y que discurre por las cimas de Olvedo, Pelistornes y Cantoblanco.

Desde Guinea el camino es muy evidente, ya que las dos primeras cimas están muy cerca y separadas por un pequeño collado. Su subida es corta y casi directa y está señalizada justo a la salida del pueblo.

Al Olvedo se llega relativamente rápido. A pesar de que las nubes a veces nos impiden apreciar las vistas, el paisaje se intuye precioso.

2017-01-22_10-36-17

Para pasar del Olvedo al Pelistornes tan sólo tenemos que cruzar el collado y llegaremos en apenas 10 minutos a nuestra segunda cima del día.

2017-01-22_10-53-02

Una vez coronadas las cimas anteriores hay que continuar la travesía en dirección a la al Cantoblanco, que se asciende tras un durillo cortafuegos.

20170122_123405

Desde la cima tenemos justo en frente el Montemayor, máxima altura de la vecina sierra de Arkamo.2017-01-22_13-00-09

Finalmente, iniciamos el descenso hacia la curiosa localidad de Salinas de Añana...

20170122_142807

...donde podremos completar la ruta con una visita a las propias Salinas.

20170122_142812

Una ruta de unos 15 kilómetros sin dificultades reseñables. Únicamente se hace necesaria logística de vehículos. De no tener esta facilidad entonces es mejor realizar únicamente la subida al Olvedo y Pelistornes.

Los Retos de 2017

Publicado el 01/24/2017 por 12meses12montes

Bueno, un nuevo año que ha pasado y uno nuevo que acaba de comenzar. 2016 fue un año muy intenso, si bien los retos que nos marcamos en un principio sólo se vieron cumplidos en una tercera parte. No fue un buen año para ellos, ésta vez la alineación de planetas se generó en pocas ocasiones.

Sin embargo, no decaemos. Cogemos el testigo y no vamos a desistir en su intento, por lo que los retos que no conseguimos cumplir en 2016 serán los que tratemos de realizar en 2017, más algunos otros, a ver qué os parecen. Seguir leyendo
