

The Superlative Light: They bring the stars to earth!; Inside the Texas Petawatt Laser

Robert Shults series of images draws upon the visual traditions of grade B science-fiction cinema in its exploration of a truly unique space where some of the most extreme conditions in the universe are recreated, recasting real working scientists as the heroes of an imaginary epic. Robert Shults is based in Austin, Texas. His work has been included in exhibitions at The Print Center, Rangefinder Gallery, and The Camera Club of New York. His publication credits include The New Yorker, Slate, WIRED, Smithsonian, and The New York Times. Todd Ditmire received his Ph.D. in physics from the University of California at Davis in 1995. He is currently a professor of physics at the University of Texas at Austin, where he is director of the Texas Center for High Intensity Laser Science and the Texas Petawatt Project. He was previously a staff scientist and project leader at Lawrence Livermore National Laboratory in California. Rudy Rucker is a writer and a mathematician who worked for twenty years as a Silicon Valley computer science professor, and published a number of software packages. Rucker is regarded as contemporary master of science-fiction, and received the Philip K. Dick award twice. [His thirty published books include both novels and non-fiction books on the fourth dimension, infinity, and the meaning of computation. A founder of the cyberpunk school of science-fiction, Rucker also writes SF in a realistic style known as transrealism. His 2006 *Mathematicians in Love* was an example of a transreal novel. His early cyberpunk four-book series was republished in 2010 as *The Ware Tetralogy*. Ruckers 2007 novel, *Postsingular* was something of a return to the cyberpunk style, as was the 2009 sequel, *Hylozoic*, in which every object on Earth comes to life. Ruckers autobiography, appeared in 2011. Recent novels include *Jim and the Flims*, *Turing &*

Agradable ruta realizada junto al Bilbao Alpino que parte desde la localidad alavesa de Guinea, en la vertiente Sur de la sierra de Arkamo y que discurre por las cimas de Olvedo, Pelistornes y Cantoblanco.

Desde Guinea el camino es muy evidente, ya que las dos primeras cimas están muy cerca y separadas por un pequeño collado. Su subida es corta y casi directa y está señalizada justo a la salida del pueblo.

Al Olvedo se llega relativamente rápido. A pesar de que las nubes a veces nos impiden apreciar las vistas, el paisaje se intuye precioso.

2017-01-22_10-36-17

Para pasar del Olvedo al Pelistornes tan sólo tenemos que cruzar el collado y llegaremos en apenas 10 minutos a nuestra segunda cima del día.

2017-01-22_10-53-02

Una vez coronadas las cimas anteriores hay que continuar la travesía en dirección a la al Cantoblanco, que se asciende tras un durillo cortafuegos.

20170122_123405

Desde la cima tenemos justo en frente el Montemayor, máxima altura de la vecina sierra de Arkamo.2017-01-22_13-00-09

Finalmente, iniciamos el descenso hacia la curiosa localidad de Salinas de Añana...

20170122_142807

...donde podremos completar la ruta con una visita a las propias Salinas.

20170122_142812

Una ruta de unos 15 kilómetros sin dificultades reseñables. Únicamente se hace necesaria logística de vehículos. De no tener esta facilidad entonces es mejor realizar únicamente la subida al Olvedo y Pelistornes.

Los Retos de 2017

Publicado el 01/24/2017 por 12meses12montes

Bueno, un nuevo año que ha pasado y uno nuevo que acaba de comenzar. 2016 fue un año muy intenso, si bien los retos que nos marcamos en un principio sólo se vieron cumplidos en una tercera parte. No fue un buen año para ellos, ésta vez la alineación de planetas se generó en pocas ocasiones.

Sin embargo, no decaemos. Cogemos el testigo y no vamos a desistir en su intento, por lo que los retos que no

conseguimos cumplir en 2016 serán los que tratemos de realizar en 2017, más algunos otros, a ver qué os parecen. Seguir leyendo
