

## The Cosmic Inquirers: Modern Telescopes and Their Makers

The Cosmic Inquirers gives a remarkable inside view of the people who helped to forge some of the most sensitive tools of modern science, the astronomical observatories. Based on interviews with pioneers in several fields of astronomy, this book recounts the efforts of scientists to promote, design, and build these magnificent instruments despite political and technical obstacles. The astronomers in these pages tell us, in their own words, about their struggles with Congress, NASA, and colleagues to obtain support and funding. They speak candidly about the demands that Big Science places on its practitioners, and about their personal ambitions and frustrations, the problems with their profession, and the direction of future research. The Tuckers interweave into the fabric of their human story the scientific challenges posed by these observatories, most of which orbit about the earth's obscuring atmosphere. These telescopes have probed the entire electromagnetic spectrum, from radio waves to x-rays to gamma radiation, and have yielded a new understanding of phenomena as diverse as quasars, black holes, pulsars, and starburst galaxies. This book invites us to view these telescopes not merely as technological wonders but as the life's labor and achievement of outstanding individuals.

Agradable ruta realizada junto al Bilbao Alpino que parte desde la localidad alavesa de Guinea, en la vertiente Sur de la sierra de Arkamo y que discurre por las cimas de Olvedo, Pelistornes y Cantoblanco.

Desde Guinea el camino es muy evidente, ya que las dos primeras cimas están muy cerca y separadas por un pequeño collado. Su subida es corta y casi directa y está señalizada justo a la salida del pueblo.

Al Olvedo se llega relativamente rápido. A pesar de que las nubes a veces nos impiden apreciar las vistas, el paisaje se intuye precioso.

2017-01-22\_10-36-17

Para pasar del Olvedo al Pelistornes tan sólo tenemos que cruzar el collado y llegaremos en apenas 10 minutos a nuestra segunda cima del día.

2017-01-22\_10-53-02

Una vez coronadas las cimas anteriores hay que continuar la travesía en dirección a la al Cantoblanco, que se asciende tras un durillo cortafuegos.

20170122\_123405

Desde la cima tenemos justo en frente el Montemayor, máxima altura de la vecina sierra de Arkamo.2017-01-22\_13-00-09

Finalmente, iniciamos el descenso hacia la curiosa localidad de Salinas de Añana...

20170122\_142807

...donde podremos completar la ruta con una visita a las propias Salinas.

20170122\_142812

Una ruta de unos 15 kilómetros sin dificultades reseñables. Únicamente se hace necesaria logística de vehículos. De no tener esta facilidad entonces es mejor realizar únicamente la subida al Olvedo y Pelistornes.

Los Retos de 2017

Publicado el 01/24/2017 por 12meses12montes

Bueno, un nuevo año que ha pasado y uno nuevo que acaba de comenzar. 2016 fue un año muy intenso, si bien los retos que nos marcamos en un principio sólo se vieron cumplidos en una tercera parte. No fue un buen año para ellos, ésta vez la alineación de planetas se generó en pocas ocasiones.

Sin embargo, no decaemos. Cogemos el testigo y no vamos a desistir en su intento, por lo que los retos que no conseguimos cumplir en 2016 serán los que tratemos de realizar en 2017, más algunos otros, a ver qué os parecen.
