

## Newton's Optical Writings: A Guided Study (Masterworks of Discovery)

Isaac Newton's classic writings on light and optics are the heart of this volume in the series, *Masterworks of Discovery: Guided Studies of Great Texts in Science*. The innovative series is aimed at making the great works of scientific discovery accessible to students and lay readers. For each volume, distinguished historians of science have carefully selected original texts (or extracts) and accompanied them with interpretive commentary, explanatory notes, and bio-bibliographical material. These volumes are not synopses or histories to take the place of the original works. Instead, they enable non-specialists to read these classics for themselves and take an active part in discovering the excitement of scientific discovery. Newton first revealed his scientific genius in his pathbreaking work on optics and the properties of light. Through Newton's early 1672 letter to the Royal Society and long extracts from his mature work, *Opticks* (1704), the reader can follow Newton's own descriptions of his experiments on prisms and films, his arguments about white and colored light and the particle nature of light, and his influential remarks on scientific method. Dennis Sepper's deft commentaries, diagrams, and notes help clarify difficulties that modern readers are apt to encounter in Newton's language and science. Sepper also provides an engaging sketch of Newton's life, the scientific background to these discoveries, and their aftermath.

Agradable ruta realizada junto al Bilbao Alpino que parte desde la localidad alavesa de Guinea, en la vertiente Sur de la sierra de Arkamo y que discurre por las cimas de Olvedo, Pelistornes y Cantoblanco.

Desde Guinea el camino es muy evidente, ya que las dos primeras cimas están muy cerca y separadas por un pequeño collado. Su subida es corta y casi directa y está señalizada justo a la salida del pueblo.

Al Olvedo se llega relativamente rápido. A pesar de que las nubes a veces nos impiden apreciar las vistas, el paisaje se intuye precioso.

2017-01-22\_10-36-17

Para pasar del Olvedo al Pelistornes tan sólo tenemos que cruzar el collado y llegaremos en apenas 10 minutos a nuestra segunda cima del día.

2017-01-22\_10-53-02

Una vez coronadas las cimas anteriores hay que continuar la travesía en dirección a la al Cantoblanco, que se asciende tras un durillo cortafuegos.

20170122\_123405

Desde la cima tenemos justo en frente el Montemayor, máxima altura de la vecina sierra de Arkamo.2017-01-22\_13-00-09

Finalmente, iniciamos el descenso hacia la curiosa localidad de Salinas de Añana...

20170122\_142807

...donde podremos completar la ruta con una visita a las propias Salinas.

20170122\_142812

Una ruta de unos 15 kilómetros sin dificultades reseñables. Únicamente se hace necesaria logística de vehículos. De no tener esta facilidad entonces es mejor realizar únicamente la subida al Olvedo y Pelistornes.

Los Retos de 2017

Publicado el 01/24/2017 por 12meses12montes

Bueno, un nuevo año que ha pasado y uno nuevo que acaba de comenzar. 2016 fue un año muy intenso, si bien los retos que nos marcamos en un principio sólo se vieron cumplidos en una tercera parte. No fue un buen año para ellos, ésta vez la alineación de planetas se generó en pocas ocasiones.

Sin embargo, no decaemos. Cogemos el testigo y no vamos a desistir en su intento, por lo que los retos que no conseguimos cumplir en 2016 serán los que tratemos de realizar en 2017, más algunos otros, a ver qué os parecen. Seguir leyendo
