

Plant Tissue Culture, Second Edition: Techniques and Experiments

Plant Tissue Culture, Second Edition provides laboratory exercises in plant tissue culture that demonstrate major educational concepts. The experiments can be conducted with a variety of plant materials that are available year round from easily accessible sources. This course book will give students diverse learning experiences in a semester course. New and experienced plant scientists in agriculture, university, and industry settings will also find this concise manual to be of great value.

Key Features* Presents unique laboratory exercises using a variety of plant materials and step-by-step protocols* Provides detailed line drawings that complement both introductions and experiments* Includes supplementary sections* Scheduling and interrelationships of exercises for teachers* Tissue culture laboratory setup* Supplies, media, and explant preparation* Measurements* Glossary of terms* Exercises rigorously tested for practicality through years of course use* Contains two new chapters*History of Plant Cell Culture by Trevor Thorpe* Woody Plants and Shrubs by Brent McCown* Adaptable by teachers, students, researchers, and technicians

Agradable ruta realizada junto al Bilbao Alpino que parte desde la localidad alavesa de Guinea, en la vertiente Sur de la sierra de Arkamo y que discurre por las cimas de Olvedo, Pelistornes y Cantoblanco.

Desde Guinea el camino es muy evidente, ya que las dos primeras cimas están muy cerca y separadas por un pequeño collado. Su subida es corta y casi directa y está señalizada justo a la salida del pueblo.

Al Olvedo se llega relativamente rápido. A pesar de que las nubes a veces nos impiden apreciar las vistas, el paisaje se intuye precioso.

2017-01-22_10-36-17

Para pasar del Olvedo al Pelistornes tan sólo tenemos que cruzar el collado y llegaremos en apenas 10 minutos a nuestra segunda cima del día.

2017-01-22_10-53-02

Una vez coronadas las cimas anteriores hay que continuar la travesía en dirección a la al Cantoblanco, que se asciende tras un durillo cortafuegos.

20170122_123405

Desde la cima tenemos justo en frente el Montemayor, máxima altura de la vecina sierra de Arkamo.2017-01-22_13-00-09

Finalmente, iniciamos el descenso hacia la curiosa localidad de Salinas de Añana...

20170122_142807

...donde podremos completar la ruta con una visita a las propias Salinas.

20170122_142812

Una ruta de unos 15 kilómetros sin dificultades reseñables. Únicamente se hace necesaria logística de vehículos. De no tener esta facilidad entonces es mejor realizar únicamente la subida al Olvedo y Pelistornes.

Los Retos de 2017

Publicado el 01/24/2017 por 12meses12montes

Bueno, un nuevo año que ha pasado y uno nuevo que acaba de comenzar. 2016 fue un año muy intenso, si bien los retos que nos marcamos en un principio sólo se vieron cumplidos en una tercera parte. No fue un buen año para ellos, ésta vez la alineación de planetas se generó en pocas ocasiones.

Sin embargo, no decaemos. Cogemos el testigo y no vamos a desistir en su intento, por lo que los retos que no conseguimos cumplir en 2016 serán los que tratemos de realizar en 2017, más algunos otros, a ver qué os parecen. Seguir leyendo
