

Safety Indicators A New View: 5 Leading Indicators for a New Level of Safety Performance

Don't miss this no-nonsense, logical, relevant gem of a book taking on the traditional views of impacting safety which actually keep us from making that next leap. Take a new look at leading indicators for safety performance with this high-level approach to the lessons we have been focusing on for the past decade in the realm of Safety Leadership. Using a common sense and elegant framework, this book provides a road map for identifying, tracking, and improving those critical actions that lead to a step change in safety performance. Safety Leadership was identified decades ago as a significant factor in safety performance. In fact, the frontline leader is probably the most influential factor in how frontline workers behave. This New View on what we monitor and track to ensure we are building and sustaining a mature safety culture does not focus on Safety Audits that look for paperwork or documentation. These 5 Leading Indicators are focused on the critical actions taken by frontline supervisors to influence their crews and instill behaviors that foster collaborations, teamwork, and true commitment to safety. These behaviors include 1) Having Safety Intervention Conversations; 2) Asking Open Ended Questions; 3) Referring to Policies and Procedures; 4) Driving Accountability for Process Safety; and 5) Providing Accurate and Timely Feedback. Chapter themes include Even Process Safety is Behavioral, Counting (Safety) Cards, and Asking the Right Questions. Ultimately, Safety Indicators A New View: 5 Leading Indicators for a New Level of Safety Performance provides a simple framework for monitoring, tracking, and (most important) IMPROVING how frontline workers ensure safety. It can be done and this approach provides the access to accomplishing it dramatically and swiftly.

Agradable ruta realizada junto al Bilbao Alpino que parte desde la localidad alavesa de Guinea, en la vertiente Sur de la sierra de Arkamo y que discurre por las cimas de Olvedo, Pelistornes y Cantoblanco.

Desde Guinea el camino es muy evidente, ya que las dos primeras cimas están muy cerca y separadas por un pequeño collado. Su subida es corta y casi directa y está señalizada justo a la salida del pueblo.

Al Olvedo se llega relativamente rápido. A pesar de que las nubes a veces nos impiden apreciar las vistas, el paisaje se intuye precioso.

2017-01-22_10-36-17

Para pasar del Olvedo al Pelistornes tan sólo tenemos que cruzar el collado y llegaremos en apenas 10 minutos a nuestra segunda cima del día.

2017-01-22_10-53-02

Una vez coronadas las cimas anteriores hay que continuar la travesía en dirección a la al Cantoblanco, que se asciende tras un durillo cortafuegos.

20170122_123405

Desde la cima tenemos justo en frente el Montemayor, máxima altura de la vecina sierra de Arkamo.2017-01-22_13-00-09

Finalmente, iniciamos el descenso hacia la curiosa localidad de Salinas de Añana...

20170122_142807

...donde podremos completar la ruta con una visita a las propias Salinas.

20170122_142812

Una ruta de unos 15 kilómetros sin dificultades reseñables. Únicamente se hace necesaria logística de vehículos. De no tener esta facilidad entonces es mejor realizar únicamente la subida al Olvedo y Pelistornes.

Los Retos de 2017

Publicado el 01/24/2017 por 12meses12montes

Bueno, un nuevo año que ha pasado y uno nuevo que acaba de comenzar. 2016 fue un año muy intenso, si bien los retos que nos marcamos en un principio sólo se vieron cumplidos en una tercera parte. No fue un buen año para ellos, ésta vez la alineación de planetas se generó en pocas ocasiones.

Sin embargo, no decaemos. Cogemos el testigo y no vamos a desistir en su intento, por lo que los retos que no conseguimos cumplir en 2016 serán los que tratemos de realizar en 2017, más algunos otros, a ver qué os parecen. Seguir leyendo
